Section II Proposed Rules

DEPARTMENT OF EDUCATION

State Board of Education

RULE NO.: RULE TITLE:

6A-6.0951 The Hope Scholarship Program

PURPOSE AND EFFECT: To implement a reporting system for the notice provided to parents of the availability of a Hope Scholarship and to update the Hope notification form to clarify that eligibility for a scholarship can be based upon substantiated and unsubstantiated incidents listed in section 1002.40(3), F.S.

SUMMARY: The proposed rule requires school districts to report the number of Hope Scholarship Notification Forms provided to parents for each substantiated and unsubstantiated incident reported. Additionally, the amendment also makes adjustments to the Hope Notification Form to align qualifying incidents with the recent revisions to SESIR reporting required by Rule 6A-1.0017, simplify the incident location, provide information about the availability of up to \$750 in transportation funding when a student enrolls in a public school outside of the resident district and to provide notice of the reporting requirement.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described

herein: The amended rule and notification form largely outline existing requirements concerning eligibility and notification for the Hope Scholarship. The amended reporting requirements are not expected to have any adverse impact on economic growth, business competitiveness or any other factors listed in s. 120.541(2)(a), F.S., and will not require legislative ratification. No increase in regulatory costs are anticipated as a result of the rule changes.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

RULE NO.: RULE TITLE:

61C-4.010 Sanitation and Safety Requirements

The Florida Department of Business and Professional Regulation, Division of Hotels and Restaurants hereby gives notice: On June 11, 2020 the Division of Hotels and Restaurants received a Petition for an Emergency Variance for subparagraph 3-305.11(A)(2), 2017 FDA Food Code, Section

3-305.14, 2017 FDA Food Code, Section 6-202.15, 2017 FDA Food Code, Section 6-202.16, 2017 FDA Food Code, subsection 61C-4.010(1), Florida Administrative Code, and subsection 61C-4.010(6), Florida Administrative Code from EL LUNCH LATINO LLC located in Clearwater. The above referenced F.A.C. addresses the requirement for proper handling and dispensing of food. They are requesting to dispense bulk time/temperature control for safety foods from an open air mobile food dispensing vehicle.

The Petition for this variance was published in Vol 46/115. The Order for this Petition was signed and approved on June 22, 2020. After a complete review of the variance request, the Division finds that the application of this Rule will create a financial hardship to the food service establishment. Furthermore, the Division finds that the Petitioner meets the burden of demonstrating that the underlying statute has been achieved by the Petitioner ensuring that each pan within the steam table is properly covered with an individual lid; the steam table is enclosed within a cabinet with tight-fitting doors, and is protected by an air curtain installed and operated according to the manufacturer’s specifications that protects against flying vermin or other environmental contaminants; all steam table foods must be properly reheated for hot holding at approved commissaries and held hot at the proper minimum temperature per the parameters of the currently adopted FDA Food Code; and steam table food is to be dispensed by the operator with no customer self-service. The Petitioner shall also strictly adhere to the operating procedures and copies of the variance and operating procedures are to be present on the MFDV during all periods of operation.

DEPARTMENT OF EDUCATION

University of Florida

NOTICE TO CONSTRUCTION MANAGERS

The University of Florida Board of Trustees announces that CM-At-Risk services will be required for the project listed below:

Project: UF-623C, Electrical Utilities Infrastructure (Main UF Campus)

With the expiration of the utility supply agreement between the University of Florida (UF) and Duke Energy (DE), numerous campus infrastructure systems must be redeveloped. One such system is the electrical supply from DE to serve UF. Replacement of the existing DE-owned substation (commonly referred to as the UF substation), which serves a significant portion of the UF campus, will be required.

The UF campus electrical system will be reconfigured to take service from a new switching station by Duke Energy (DE), located to the north of the existing DE substation on Archer Road. This connection will be at transmission voltage level (69kV). UF will provide breakers and switches for connection of three circuits from DE. Underground cables routed in concrete encased duct bank will supply power to the campus by means of a UF owned and operated substation co-located with the planned new thermal plant. This substation will step the voltage down to the distribution level (23kV) through three large transformers feeding campus switchgear lineups with ties for redundancy and reliability. Feeders out of this switchgear will reconnect into the existing campus electrical distribution infrastructure with modifications as discussed herein.

The total project budget is \$45,000,000 and the approximate construction budget is \$38,000,000. This scope also includes the redevelopment of the old Duke / UF substation site at the existing cogeneration plant location to include the demolition of the old 23kV / 5kV transformers, 5kV switches and infrastructure around the Duke location. The design will reconfigure the 5kV system in this area to eliminate some of the transformers. The transformers that serve the hospital district will be relocated to the hospital area (with extended 23kV feeders). The transformers that serve Rabon Plant will be removed with the relocation of the chiller plant facilities to the Gale Lemerand location, and the transformers that service Substation 2 will be replaced and relocated adjacent to Substation 2. Where practical, larger transformers will be considered, reducing the quantity of assets in the UF inventory. The contract for construction management services will consist of two phases, pre-construction and construction. Pre-construction services has already begun, and design is progressing. Work will begin immediately with the Design Development or the CD documents which will include production of cost studies and estimates; value engineering; analysis of the design documents for constructability, coordination, detailing, materials, and systems; development and maintenance of the construction schedule; production of detailed jobsite management plans; development of strategies for the procurement of trade contracts; development of waste management strategies; and development of a Guaranteed Maximum Price (GMP) proposal based on the Construction

Documents. If the GMP proposal is accepted and executed, the construction phase will be implemented. In this phase, the construction manager becomes the single point of responsibility for performance of the construction of the project and shall publicly bid trade contracts. Failure to negotiate an acceptable fixed fee for phase one of the contract, or failure to arrive at an acceptable GMP budget within the time provided in the agreement, may result in the termination of the construction manager's contract.

Applicants will be evaluated on the basis of their past performance, experience, personnel, references, bonding capacity, workload, and responses to questions posed both in the shortlist and interview phases. The Selection Committee may reject all proposals and stop the selection process at any time.

At the time of application, the applicant must be licensed to practice as a general contractor in the State of Florida and, if the applicant is a corporation, must be chartered by the Florida Department of State to operate in Florida. The selected applicant will also be required to provide insurance coverage for General Liability, Automotive Liability, Workers' Compensation, and Builder's Risk.

Applicants desiring to provide construction management services for the project shall submit a proposal only after thoroughly reviewing the facilities program, Project Fact Sheet, and other background information. The proposal shall be prepared as specified in the CMQS Instructions and shall include:

1. A Letter of Application that concisely illustrates the applicant's understanding of the scope of services, schedule, and other goals and considerations as outlined in the Project Fact Sheet and facilities program.
2. Company information and signed certification.
3. A completed, project-specific "CM Qualifications Supplement" (CMQS) proposal. Applications on any other form will not be considered.
4. Proof of the applicant's corporate status in Florida (if applicable) and a copy of the applicant firm's current contracting license from the appropriate governing board.
5. Proof of applicant's bonding capacity and liability insurance coverage.

If the applicant is a corporation, it must be chartered by the Florida Department of State to operate in Florida. As required by Section 287.133, Florida Statutes, an applicant may not submit a proposal for this project if it is on the convicted vendor list for a public entity crime committed within the past 36 months. The selected construction manager must warrant that it will neither utilize the services of, nor contract with, any supplier, subcontractor, or consultant in excess of \$15,000.00 in connection with this project for a period of 36 months from the date of their being placed on the convicted vendor list.

Incomplete proposals will be disqualified. Submittal materials will not be returned.

Additional information to assist the applicant in preparing a complete proposal – including the project-specific CMQS forms, instructions, Project Fact Sheet, facilities program, UF Design Services Guide, UF Design and Construction Standards, standard University of Florida Agreement for CM Services, and other project and process information – can be found on the Planning Design & Construction website.

Finalists may be provided with supplemental interview requirements and criteria as needed.

Provide the number of copies prescribed in the Project Fact Sheet. Submittals must be received in the Planning Design & Construction office by 3:00 p.m. local time on Wednesday, July 22, 2020. Facsimile (FAX) submittals are not acceptable and will not be considered.

UCF -598 Arecibo Observatory Suspension Cable Replacement

NOTICE TO CONTRACTORS

The University of Central Florida, announces that services in the disciplines of general contracting services will be required for the project listed below:

Project No.: UCF - 598

Project and Location: Main Telescope Suspension Cable Replacement. Arecibo Observatory Route 625 Bo Esperanza, Arecibo, PR 00612

The Main Telescope Suspension Cable Replacement project aims to replace the damaged main suspension cable M8-4 for the telescope, located in tower 8 of the Arecibo Observatory. Project consists of the replacement of a 3" diameter stranded cable (M8-4) of roughly 700-foot length, one of nine cables on the Arecibo telescope, located in Puerto Rico. The replacement of this cable is critical to ensure long term structural health of the platform structure, and all the equipment it hosts. DEPARTMENT OF EDUCATION

Florida International University

FIU-Engineering Building, BT-919 A/E

NOTICE TO ARCHITECT/ENGINEERS BT-919 Engineering Building

The Florida International University Board of Trustees announces that services in the discipline of Architecture/Engineering are required for the project identified below:

Project Name and Number: Engineering Building, BT-919

Project Location: Modesto Maidique Campus, Miami, Florida

Project Description:

The building will be located on the Modesto A. Maidique campus to facilitate and enhance ongoing and future collaborations between the College of Engineering and Computing and the health sciences colleges of medicine, nursing, and public health. Many of the most significant breakthroughs in health sciences will increasingly be at the interface between these disciplines and engineering and computer science. The project budget includes costs of upgrading and extending existing central campus infrastructure to the project site.

In anticipation of the growth expected through the FIU 2020 Strategic Plan, the Department of Defense engineering needs projection for the next decade, and the President's Jobs and Competitiveness Council call for 10,000 additional engineers, FIU will commit E&G funding for over 100 new engineering and computer science faculty. The proposed engineering building will provide laboratory and classroom facilities for these new students and faculty. Through this new facility, faculty and students, FIU will graduate an additional 350 engineers and computer scientists annually, increase its externally funded research expenditures by \$30 million annually, create 550 new jobs in the community, submit an additional 27 patent applications annually, and create one FIU intellectual-property-based company every other year by 2025. The Florida Legislature appropriated \$10,000,000 for this project in 2017-18 and \$20,641,537 in 2018-2019, which funded planning and partially funded construction for this important and critically needed facility. The 2020-2021 State

appropriation includes \$8,266,104 (subject to final approval), which brings the balance of funding to \$38,907,641 for Phase 1 construction and equipment and partial funding for Phase 2 for planning. Private

fundraising and research indirect funding will comprise \$15 million of \$54 million of phase I total project cost, 28% of the total budget, to complete 67% of building shell space to be built primarily for research labs.

FIU is committed to producing buildings that comply with sustainable energy conservation strategies and standards (minimum LEED Silver Certification).

The project scope may be modified by FIU, in its sole discretion, to reduce scope, or to include additional spaces or square feet should a funding source for such scope increases be identified prior to project completion. The project is planned to be designed and constructed in two or more phases. The first phase would include the project described in the approved Program dated June 22, 2020 as Phase 1. The second phase would include additional areas as generally contemplated in the description of Phase 2 in the approved Program. With required approvals, components of Phase 1 and Phase 2 may be revised due to funding changes and/or changing program needs. The selected Architecture/Engineering firm may be instructed to proceed with Phase 2 of the project if funding becomes available prior to completion of Phase 1. However, FIU may elect to initiate a new selection process for A/E services for Phase 2 even if the A/E firm for Phase I has done preliminary work for Phase 2, and the selection of an A/E firm for Phase 1 is not a guarantee of any work for Phase 2. Further, if funding for Phase 2 is not available prior to completion of the construction of Phase 1, a new selection process for A/E services will occur.

INSTRUCTIONS:

Firms desiring to apply for consideration shall submit copies of a Letter of Intent and Summary with an Introduction Narrative highlighting qualifications/legal nature of organization including a proposed organization chart and the following required proposal data attached:

1. A completed "Florida International University Professional Qualifications Supplement (FIUPQS)." The latest version of official FIUPQS forms (FIUPQS_08_2015) must be downloaded from the FIU web site at <https://facilities.fiu.edu/projects/BT-919.htm>. Applications on any other form will not be considered.
2. A copy of the applicant's current Professional Registration Certificate(s) from the appropriate Governing board. An applicant must be properly licensed and authorized to practice its profession in the State of Florida at the time of application, in accordance with Florida Law. If the applicant is a corporation, it must be properly chartered by the Florida Department of State to operate in Florida.

Submit ten (10) bound copies of the required proposal data and one electronic copy in Adobe Acrobat PDF format of the requested qualifications to: Selection Committee, Florida International University, Facilities Planning, Campus Support Complex, 11555 S.W. 17th St., Room CSC-142, Modesto A. Maidique Campus, Miami, Florida 33199. Applications that do not comply with the above instructions will not be considered. Application material will not be returned. The University reserves the right to suspend or discontinue the selection process at any time and to return or reject any or all submissions of qualifications without obligation to the respondent.
